Wyoming	89	58	13	12	6	12	6	7	4	5	3

Notes: FY is fiscal year. Enrollment numbers generally include individuals ever enrolled in Medicaid-financed coverage during the year, even if for a single month; however, in the event individuals were also enrolled in CHIP-financed Medicaid coverage (i.e., Medicaid-expansion CHIP) during the year, they are excluded if their most recent enrollment month was in Medicaid-expansion CHIP. Numbers exclude individuals enrolled only in Medicaid-expansion CHIP during the year and enrollees in the territories.

Due to the unavailability of several states' Medicaid Statistical Information System (MSIS) Annual Person Summary (APS) data for FY 2013, the source used in prior editions of this table, MACPAC calculated enrollment from the full MSIS data files that are used to create the APS files. For MACPAC's analysis, Medicaid enrollees were assigned a unique national identification (ID) number using an algorithm that incorporates state-specific ID numbers and beneficiary characteristics such as date of birth and gender. The state and national enrollment counts shown here are unduplicated using this national ID. Categories may not sum to total for each state due to rounding. In addition, the sum of the state totals exceeds the national total because individuals may be enrolled in more than one state during the year.

0 indicates an amount less than 500 that rounds to zero.

¹ Children and adults under age 65 who qualify for Medicaid on the basis of disability are included in the disabled category. About 746,000 enrollees age 65 and older are identified in the data as disabled; given that disability is not an eligibility pathway for individuals age 65 and older, MACPAC recodes these enrollees as aged.

² Dually eligible enrollees are covered by both Medicaid and Medicare; those with limited benefits receive only Medicaid assistance with Medicare premiums and cost sharing.

³ State had a change in total enrollment of 10 percent or more over the prior year. These data may reflect data anomalies in the submission of MSIS data for the current or prior years and may be updated in future MSIS submissions by states. MSIS data anomalies have been compiled and reported by Mathematica Policy Research; the data anomalies report may be found at: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/MedicaidDataSourcesGenInfo/downloads/anomalies1.pdf>.

⁴ When compared to the December 2015 edition of this table, Texas had a change in total enrollment of 10 percent or more over the prior year. However, Texas has since updated its 2012 enrollment total and no longer has a change of 10 percent or more.
